

805 waterfowl starter minipellet (2mm)

complete pellet. For all waterfowl which eat on land starting from day 1 till about 12 weeks old

Available packaging:

20 kg

2 kg

Feeding advice

- about 8 weeks before brooding switch over to 803 waterfowl breeder pellet so that the animals lay enough well-fertilized hatching eggs
- give waterfowl babies / ducklings and goslings from day 1 till about the 12th week 805 waterfowl starter minipellet. This small pellet ensures a uniform development of the whole duckling
