

816 waterfowl condition/show pellet

complete pellet. For all waterfowl which eat on land, and for waterfowl which need extra attention for feathering and health

Available packaging:

20 kg

Feeding advice

- about 8 weeks before brooding switch over to 803 waterfowl breeder pellet so that the animals lay enough well-fertilized hatching eggs
- give waterfowl babies / ducklings and goslings from day 1 till about the 12th week 805 waterfowl starter minipellet. This small pellet ensures a uniform development of the whole duckling
- switch over afterwards to 816 waterfowl condition/show pellet

Composition:

maizemash, barley, soya dehulled extracted toasted, maize gluten feed, dehydrated alfalfa meal, apple molasses, rape seed extracted, shell grit, wheat, brewer's yeast, lecithin, organic acids
